

1. Part hair from the temple on each side toward the back & clip hair on top of the head .

2. Place headband over the head resting on the forehead and release the clip letting the hair fall.

3. Gather 2 small sections of hair from the front & center of the hair line.

4. Create a fishtail braid of about 5 or 6 stitches , then add a small section from each side

5. Continue step 4 until you reach about the middle of the ear .

6. Finish fishtail braid leaving the section underneath the braid loose

7. Move the fishtail braid out of the way as to more easily access the section underneath.

8. Separate the section into 3 sections and braid to the end and secure with an elastic.
